

Industrial and commercial construction

- > Own planning and production
- > Optimised turn-key construction
- > Logistical know-how
- > Energy-efficient

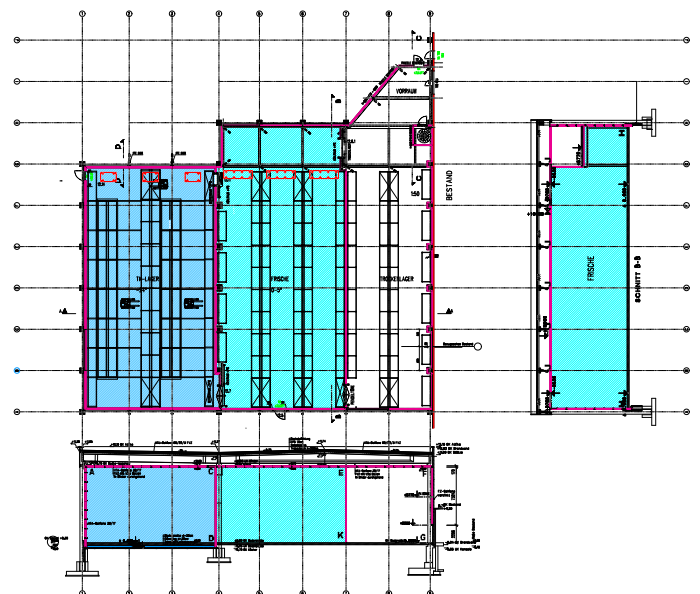

Throughput – guaranteed!

We have many years of experience in industrial and commercial construction. We are experts in safe, reliable storage of food, fruit and vegetables. Naturally, we also contribute this experience to the implementation of your construction project and pay particular attention to the following aspects, for example:

- optimum storage
- processing
- order-picking
- complete logistics
- high economic efficiency
- energy-optimisation

Shelf system solution outgoing goods warehouse

Transparent production

Individual interior design

We adapt the interior design of your industrial or commercial buildings to the individual requirements of your products and services. Here you also benefit from our many years of experience and expertise, which goes far beyond classic warehouse and transshipment hall construction.

Contact us to discuss your individual ideas and requirements in terms of:

- shelf systems
- windows/glass constructions
- logistics services
- efficient office spaces
- product separation (e.g. to take account of ripening gas ethylene)

and all other aspects which you would like to have taken into account for your new building. Your requirements are our challenge.

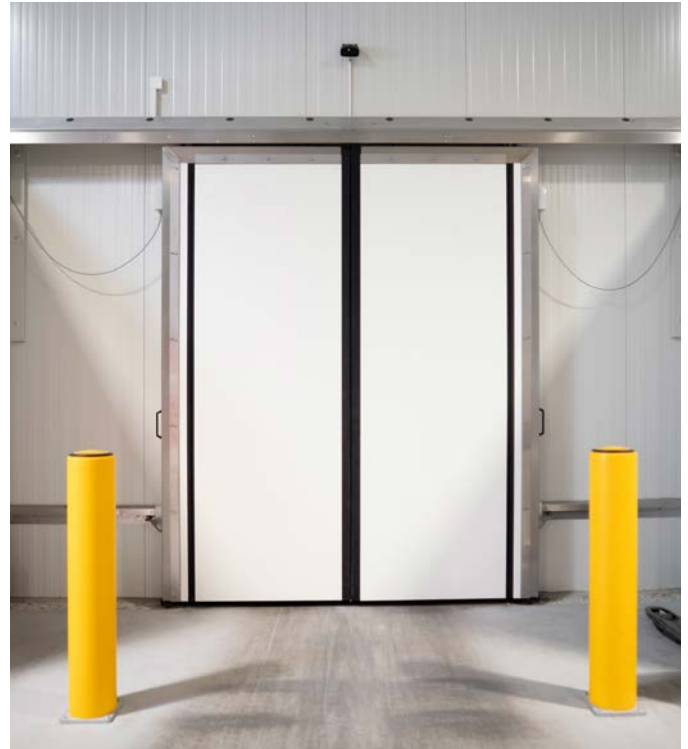

Reliability – guaranteed!

We stock an interesting selection of revolving, sliding, swing and fire protection doors as well as lift gates of various designs for your construction projects. Your individual requirements are crucial.

With our extensive range of tailor-made solutions and our innovative door and gate systems, we offer you the optimum room barrier for virtually any area of application.

Our in-house door production facilities enable optimised, on-time project implementation. Frames and door leaves are planned in accordance with the progress of the on-going installation work.

Installation is reliably carried out by our own specialist fitters.

PLAWI-Flextor

Horizontally opening high-speed doors

Freezer room sliding gate with 4-leaf PE swing door

Refrigeration room revolving door, 2-leaf in stainless steel

Sectional door with transparent slats and clean zone

Industrial and commercial construction

Together with you, our architects and engineers plan your construction project in accordance with your individual requirements and at an optimal cost/benefit ratio.

- Single- or multi-story buildings
- Climatic zone taken into account
- Effective arrangement of building areas and open spaces
- Intelligent transport connections
- Possibilities for future expansion.

Naturally we will also be pleased to advise you on

- site selection
- financing options
- interior and exterior architectural design.

Contact us and benefit from our experience and our know-how in these areas too.

Quality – guaranteed!

Our in-house production facilities and specialist areas guarantee quality, adherence to deadlines and reliability before, during and after the construction phase.

Our own assembly departments and our own specialist construction site management enable fast implementation, comprehensive support and full construction supervision

Safe, future-oriented construction by our specialist departments:

- Heat insulation
- Cold storage
- Sound-proofing
- Fire protection
- Environmental protection (heat recovery, rainwater recovery, use of natural energy sources, energy savings, disposal concepts)

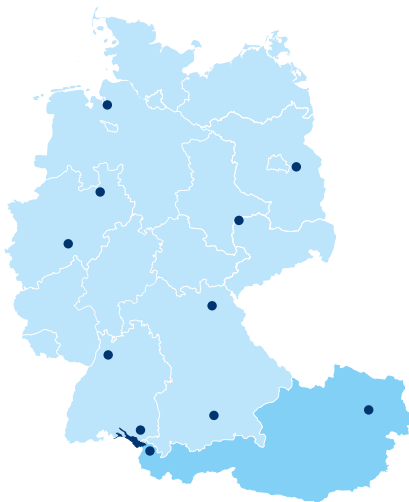

Efficient specialists in freshness for your industry

Plattenhardt + Wirth has specialised in cold room construction since **1965** and is now Europe's leading company in this field. We are headquartered in Meckenbeuren on the shores of beautiful Lake Constance.

Our long-standing experience, in-house construction and assembly departments provide our customers with a substantial value-added: swift processing, seamless building supervision, and ongoing partner support throughout the project guaranteed to give you sustained peace of mind.

Take advantage of our extensive expertise and consult us about your individual projects. We will find the right cold room solution for you.
